

ROCKET MAN

The Rocket Man is always ready for adventure. Fast and efficient for the tarmac of Cape Canaveral, with enough grip for the red sands of Arizona, or maybe even Mars. A central V-shaped tread increases rolling efficiency while raised side knobs aid traction. Rows of offset, direction-specific, tread blocks offer a smooth transition between the fast-rolling center and grippy edges.

The Rocket Man is available as a fast-rolling cross-country mountain bike tire or gravel tire.

PART NO.	MODEL	SIZE	ETRTO	COMPOUND	FEATURE	COLOR	E-BIKE	TPI	BEAD	TL READY	PSI	BAR	WEIGHT (G.)
